0045	052	ML	JUNTAS DE ESTANQUEIDAD DE PVC 32 CM Junta de trabajo interior de policloruro de vinilo (PVC) 100% virgen, con una fuerza máxima de dilatación > 250 %, de 32 cm de ancho, MASTERFLEX 2000 TI-24 de BASF o equivalente, colocada simétricamente en el eje de la losa o muro, incluso solapes y piezas especiales para cruces o ángulos. Medida la longitud ejecutada.	SIETE EUROS con TREINTA Y UN CÉNTIMOS	7,31
0046	052A	ML	MEDIA CAÑA DE IMPERMEABILIZACIÓN JUNTAS DE ESQUINA Suministro y puesta en obra de realización de medias cañas con el mortero de reparación estructural Clase R4, según Normativa Vigente UNE EN 1504, consistente en una capa de imprimación con la resina epoxi EMACO EPOXIPRIMER BP o equivalente (rendimiento 0,08 kg/m); realización de media caña con el mortero cementoso EMACO S-88 TIXOTRÓPICO o equivalente (rendimiento 4,0 kg/m). Incluso preparación de superficie. Medida la longitud ejecutada. Terminada.	NUEVE EUROS con TRECE CÉNTIMOS	9,13
0047	052B	ML	SELLADO DE JUNTAS Y ESQUINAS CON BANDA ELÁSTICA E=1 mm Sellado de juntas con banda de elastómero termoplástico (TPE) de 1 mm de espesor y 20 cm de ancho, con un alargamiento a la rotura del 600 % según DIN 53504 S2 y una dureza Shore A de aprox. 80 según ISO 868, Apta para Agua Potable según RD 140/2003, adherida al soporte al menos en 6 cm a cada lado de la junta mediante resina epoxi sin disolventes, MASTERFLEX 3000 ADHESIVO de BASF o equivalente, incluso limpieza del soporte y p.p. de solapes. Medida la longitud real ejecutada.	VEINTICINCO EUROS con SESENTA Y SEIS CÉNTIMOS	25,66
0048	053	M2	GEOTEXTIL 200 gr/m2 Geotextil de polipropileno de 200 gr/m2, totalmente colocado incluso solapes.	DOS EUROS con CUARENTA Y SEIS CÉNTIMOS	2,46
0049	053PR	M2	AISLAMIENTO ACÚSTICO FORJADO m². Aislamiento acústico a ruido aéreo y de impacto en forjados con compuesto bicapa TriACUSTIC 35, de 3,6 kg/m². de peso y 7 mm de espesor, formado por una lámina viscoelástica de alta densidad adherida térmicamente a una lámina de polietileno.	OCHO EUROS con NOVENTA Y OCHO CÉNTIMOS	8,98
0050	053imp	M2	IMPERMEABILIZACIÓN DE SOLERA m². Impermeabilización de soleras constituida por 0,3 kg/m² de imprimación asfáltica CURIDAN y lámina de betún modificado con elastómeros SBS de 4 kg/m² de peso medio, de superficie no protegida, con armadura de fieltro de poliéster y acabada con film de polietileno por ambas caras, ESTERDAN 40 P ELAST (Tipo LBM 40 FP), totalmente adherida al soporte con soplete, y geotextil de 200 g/m² como protección; lista para recibir capa de hormigón. Dispone de DIT. "Esterdan pendiente cero". N° 550/10.	OCHO EUROS con OCHENTA Y CUATRO CÉNTIMOS	8,84
0051	054	T	PAVIMENTO DE MBC AC16 surf S Pavimento de mezcla bituminosa en caliente en capa de rodadura tipo AC 16 surf S de 5 cm de espesor, que incluye riego de imprimación con dotación de 1 Kg/m2, con betún B60/70 en dotación de 70 Kg/Tm, puesto en obra y terminado.	TREINTA Y SEIS EUROS con SETENTA CÉNTIMOS	36,70

0432	452Pr	M2	RODAPIÉ CERÁMICO m. Rodapie de gres de 7 cm recibido con mortero de cemento y arena de río M5 según UNE-EN 998-2 o adhesivo si es a placa de yeso, i/rejuntado y limpieza, S/ CTE BD SU y NTE-RSP-16.	CINCO EUROS con NOVENTA Y CUATRO CÉNTIMOS	5,94
0433	452TER	ud	TERMO ELÉCTRICO 80 L JUNKERS ud. Termo eléctrico vertical/horizontal para el servicio de a.c.s acumulada, JUNKERS modelo HS 80-3B, con una capacidad útil de 80 litros. Potencia 2,0 kW. Ajuste de temperatura en intervalos de 10°C y tensión de alimentación a 230 V. Tiempo de calentamiento 140 minutos. Testigo luminoso de funcionamiento y display con indicación de temperatura. Depósito de acero vitrificado. Aislamiento de espuma de poliuretano sin CFC y ánodo de sacrificio de magnesio. Presión máxima admisible de 8 bar. Dimensiones 948 mm de alto y 452 mm de diámetro.	DOSCIENTOS CINCUENTA Y DOS EUROS con SESENTA Y UN CÉNTIMOS	252,61
0434	452UR	ud	URINARIO MURAL Ud. Urinario de Roca modelo Site, o equivalente, con grifo temporizado Presto 27 1/2" y enlace a urinario y sifón incorporado, totalmente instalado.	DOSCIENTOS VEINTIUN EUROS con CINCUENTA Y CINCO CÉNTIMOS	221,55
0435	452VT	ud	VERTEDERO ud. Vertedero modelo Garda completo con mezclador exterior de caño giratorio modelo Victoria Plus de Roca o similar,, i/rejilla, desagüe, enchufe de unión y fijación instalada.	CIENTO SETENTA Y TRES EUROS con TREINTA Y NUEVE CÉNTIMOS	173,39
0436	452ce	ud	C. ELÉCT./CON. SYSTEMTRONIC ACS 2 Ud. Cuadro eléctrico y de control formado por caja estanca e interruptores de protección. Incluso cableado y bombas de conexión. Control diferencial, marca SYSTEMTRONIC, modelo PTC 2001/rd, con dos sondas de inmersión para actuación de bomba del primario (P<250W) mediante termostato diferencial, termostato mínima en paneles y termostato de máxima en acumulación, mediante actuación directa. Incluso accesorios y pequeño material, completamente montado, probado y funcionando.	TRESCIENTOS SESENTA Y DOS EUROS	362,00
0437	452cen	ud	CENTRALITA CONTROL JUNKERS TDS 050 Ud. Centralita solar JUNKERS modelo TDS 050 de regulación para una aplicación. Regulador por temperatura diferencial. Dos entradas tipo NTC (Temperatura panel y temperatura parte inferior del depósito). Display LCD con esquema de instalación en movimiento. Indicación de temperaturas, códigos de error, modo de funcionamiento y estado de la bomba. Una salida de tensión de 230V de corriente alterna para el circulador. Posibilidad de ajuste de diferencia de temperatura de conexión. Posibilidad de aplicación para recirculación entre depósitos. Posibilidad de ajuste de temperatura máxima en acumulador. Dimensiones: 134 x 137 x 38 mm.	CIENTO SESENTA Y TRES EUROS con CINCUENTA Y CUATRO CÉNTIMOS	163,54

0615	E00347	Ud	<p>Turbidímetro portátil microprocesado</p> <p>Turbidímetro portátil microprocesado de las siguientes características: Medidor portátil, para determinar la turbidez en aguas potables y residuales. Con un rango de 0 a 1000 NTU y dos escalas de medición, de 0.00 a 50.00 NTU y de 50 a 1000 NTU, ha sido diseñado de acuerdo con el Standard Internacional ISO 7027. El equipo selecciona automáticamente el rango apropiado, de acuerdo con la turbidez de la muestra. Su funcionamiento está basado en un rayo de luz infrarrojo que atraviesa la cubeta. El sensor, colocado a 90° con respecto a la dirección de la luz, detecta la cantidad de luz dispersada por las partículas en suspensión de la muestra, la cual es transformada en valores NTU por el microprocesador. Su carcasa pesa menos de 400 gramos, aviso de pila baja, auto-apagado. La duración de la fuente de luz del Diodo de Emisión es indefinida, garantizando así el funcionamiento del equipo. Se suministra con dos cubetas de cristal, una tapa de cubeta para transporte, pila de 9 V. e instrucciones. Rango: 0.00 a 50.000 NTU; 50 a 1.000 NTU. Resolución: 0.01 y 1 NTU. Precisión: ±5% de la lectura (0 a 50 NTU); ±10% de la lectura (50 a 1.000 NTU). Fuente de luz: LED de infrarrojos. Duración de la fuente: Vida del instrumento. Detector de luz: Fotocélula de silicona. Pilas: 4 x 1.5 V. Duración de las pilas: 60 horas ó 3.000 lecturas. Auto apagado: Transcurridos 4 minutos. Condiciones de trabajo: 0 a 50°C/0 a 95% HR. 0636	EAGFL01	UD	AGITADOR DE MEZCLA LENTA. FLOCULACIÓN. P=0,55 KW. L=2.000 MM Agitador de mezcla lenta. Marca: MILTON ROY O o equivalente. Modelo: HR5A-200/350/E0,55/. Potencia motor: 0,55 kW. Velocidad salida: 16 rpm. Diámetro de hélice: 2.000 mm. Longitud del eje: 2.000 mm. Material eje y hélice: acero AISI-316L. Incluido placa de anclaje, transporte, montaje, conexiones eléctricas y de control, y pruebas de funcionamiento. Resto de características, según ET.	DOS MIL OCHOCIENTOS CUARENTA Y SEIS EUROS con CUARENTA Y CINCO CÉNTIMOS	2.846,45
0637	EANOZ01	UD	ANALIZADOR DE OZONO Analizador de ozono en el agua ATI Q45/64H. Incluso instalación y pruebas. Resto de características según E.T de proyecto.	DOS MIL SEISCIENTOS CUARENTA Y SEIS EUROS con OCHENTA CÉNTIMOS	2.646,80
0638	EBDOS01	UD	BOMBAS DOSIFICADORAS DE CAL DE 8 M3/H Y 20 MCA Bombas dosificadoras de lechada de cal de 8.000 l/h y 20 mca. AISI-316L. Potencia de 1,1 kW. Incluso transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	CINCO MIL NOVECIENTOS DIECISIETE EUROS con CUARENTA Y SEIS CÉNTIMOS	5.917,46
0639	EBHFP01	UD	BOMBA TORNILLO PURGA DE FANGOS PRIMARIOS 65,0 m3/h y 12 mca Bomba helicoidal, para bombeo de fangos decantados. Marca: MONO o equivalente. Modelo: Z38KC11RMA. Velocidad de trabajo (rpm): 80-307. Caudal a la velocidad de trabajo (m3/h): 17-65. Presión en las condiciones de trabajo (bar): 1,2. - Paso de sólidos duros/deformables (mm): 16 / 53. Detector funcionamiento en vacío. Dimensiones aspiración (mm): DN125. Dimensiones impulsión (mm): DN125. Accionamiento: eléctrico mediante motorreductor. Potencia instalada (kW): 9,2. Velocidad motor (rpm): 1.450. Tensión (V): 400. Frecuencia (Hz): 50. Bancada metálica. Incluso transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	CUATRO MIL CUATROCIENTOS DIEZ EUROS con OCHENTA Y SEIS CÉNTIMOS	4.410,86
0640	EBHFP02	UD	BOMBA TORNILLO DOSIFICACIÓN DE POLI 400 L/H Y 25 mca Bomba helicoidal, para dosificación de poli. Marca: MONO o equivalente. Modelo: C22AC11RMA. Velocidad de trabajo (rpm): 50-215. Caudal a la velocidad de trabajo (l/h): 80-400. Presión en las condiciones de trabajo (bar): 2,5. - Paso de sólidos duros/deformables (mm): 3,5 / 10. Detector funcionamiento en vacío. Dimensiones aspiración: 1 1/4" rosca BP. Dimensiones impulsión: 1 1/4" rosca BP. Accionamiento: eléctrico mediante motorreductor. Potencia instalada (kW): 0,55. Velocidad motor (rpm): 1.450. Tensión (V): 400. Frecuencia (Hz): 50. Bancada metálica. Incluso transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	NOVECIENTOS SETENTA Y NUEVE EUROS con VEINTIUN CÉNTIMOS	979,21

0641	EBHFP03	UD	BOMBA TORNILLO DOSIFICACIÓN DE ALMIDON MODIF. 425 L/H y 25 mca Bomba helicoidal, para dosificación de almidón modificado. Marca: MONO o equivalente. Modelo: C22AC80MA. Velocidad de trabajo (rpm): 55-283. Caudal a la velocidad de trabajo (l/h): 80-425. Presión en las condiciones de trabajo (bar): 2,5. - Paso de sólidos duros/deformables (mm): 3,5 / 10. Detector funcionamiento en vacío. Dimensiones aspiración: 1 1/4" rosca BP. Dimensiones impulsión: 1 1/4" rosca BP. Accionamiento: eléctrico mediante motorreductor. Potencia instalada (kW): 0,37. Velocidad motor (rpm): 1.450. Tensión (V): 400. Frecuencia (Hz): 50. Bancada metálica. Incluso transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	NOVECIENTOS CINCUENTA Y SEIS EUROS con CUARENTA Y TRES CÉNTIMOS	956,43
0642	EBHFP04	UD	BOMBA TORNILLO FANGOS A DESHIDRATACIÓN 16,0 m3/h y 15 mca Bomba helicoidal, para bombeo de fangos decantados. Marca: MONO o equivalente. Modelo: Z35KC11RMA. Velocidad de trabajo (rpm): 80-310. Caudal a la velocidad de trabajo (m3/h): 4,0-16,0. Presión en las condiciones de trabajo (bar): 1,5. - Paso de sólidos duros/deformables (mm): 10 / 35. Detector funcionamiento en vacío. Dimensiones aspiración (mm): DN80. Dimensiones impulsión (mm): DN80. Accionamiento: eléctrico mediante motorreductor. Potencia instalada (kW): 4,0. Velocidad motor (rpm): 1.450. Tensión (V): 400. Frecuencia (Hz): 50. Bancada metálica. Incluso transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	DOS MIL CIENTO SEIS EUROS con TREINTA Y NUEVE CÉNTIMOS	2.106,39
0643	EBHFP05	UD	BOMBA TORNILLO FANGOS DESHIDRATADOS 2,5 m3/h y 9 BAR Bomba helicoidal con alimentación forzada, para bombeo de fangos deshidratados. Marca: MONO o equivalente. Modelo: CW62AL2R1/G412. Velocidad de trabajo (rpm): 35-78. Caudal a la velocidad de trabajo (m3/h): 1,0-2,5. Presión en las condiciones de trabajo (bar): 9,0. - Paso de sólidos duros/deformables (mm): 12 / 40. Detector funcionamiento en vacío. Dimensiones aspiración (mm): 1.000X360. Dimensiones impulsión (mm): DN100. Accionamiento: eléctrico mediante motorreductor. Potencia instalada (kW): 7,5. Velocidad motor (rpm): 1.450. Tensión (V): 400. Frecuencia (Hz): 50. Bancada metálica. Incluso sistema de protección ETI y protección contra sobrepresiones, transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	CINCO MIL DOSCIENTOS CUARENTA Y DOS EUROS con SETENTA Y SEIS CÉNTIMOS	5.242,76
0644	EBLF01	M2	BOMBA EJE VERTICAL Q=470 M3/H. H=10 MCA. P=22 KW Bomba centrífuga de eje vertical, marca CAPRARI o equivalente, modelo P16C/10/35/1H, capaz de elevar un caudal unitario de 470 m3/h a 10 m.c.a. Impulsor DN-250 mm. Potencia de la bomba 22 kW. Incluido el colador, la línea de transmisión, grupo de mando. Transporte de los materiales a obra, montaje, pruebas, limpieza y puesta en marcha. Resto de características según ET.	ONCE MIL TRESCIENTOS CINCUENTA Y CINCO EUROS con TREINTA Y NUEVE CÉNTIMOS	11.355,39

0645	EBMV01	UD	BOMBA MONOBLOCK VERTICAL Q=18,32 l/s H=130 mca Bomba multietapa monoblock vertical tipo HVU50/4A+V30370221-V de Caprari o equivalente para bombeo de un caudal de 66 m3/h (16,82 l/s) y una altura de 130 m.c.a. Aspiración DN65 e impulsión DN50. Cuerpo de función, rodete en acero inoxidable. Motor eléctrico asíncrono, trifásico, cerrado, estandarizado según normas UNEL-IEC de 37 kW-4P-50Hz-400V-IP-55, estructura de soporte en perfiles de acero electrosoldado. Transmisor de presión inteligente. Resto de características según E.T. de Proyecto. Instalada y probada en obra.	CINCO MIL SEISCIENTOS CINCUENTA Y CUATRO EUROS con NOVENTA Y DOS CÉNTIMOS	5.654,92
0646	EBMV02	UD	BOMBA CENTRIFUGA MULTIETAPA VERTICAL Q=6,69 l/s H=90 mca Bomba centrífuga multietapa vertical tipo CR 20-10 A-F-A-E-HQQE de Grundfos o equivalente para bombeo de un caudal de 6,69 l/s y una altura de 90 m.c.a. Aspiración DN50 e impulsión DN50. Cuerpo de función, rodete en acero inoxidable. Motor eléctrico asíncrono, trifásico, cerrado, de 11 kW-4P-50Hz-380-415V-IP-55, estructura de soporte en perfiles de acero electrosoldado. Cuadro controlador y supervisor de bombas según E.T. Resto de características según E.T. de Proyecto. Instalada y probada en obra.	SEIS MIL TRESCIENTOS UN EUROS con SESENTA Y UN CÉNTIMOS	6.301,61
0647	EBMV03	UD	BOMBA CENTRIFUGA MULTIETAPA VERTICAL Q=21,59 l/s H=180 mca Bomba centrífuga multietapa vertical tipo CR 95-8-2 A-F-A-E-HQQE de Grundfos o equivalente para bombeo de un caudal de 21,59 l/s y una altura de 180 m.c.a. Aspiración DN50 e impulsión DN50. Cuerpo de función, rodete en acero inoxidable. Motor eléctrico asíncrono, trifásico, cerrado, de 55kW-4P-50Hz-380-415V-IP-55, estructura de soporte en perfiles de acero electrosoldado. Cuadro controlador y supervisor de bombas según E.T. Resto de características según E.T. de Proyecto. Instalada y probada en obra.	VEINTIUN MIL NOVECIENTOS SETENTA EUROS con CUARENTA Y TRES CÉNTIMOS	21.970,43
0648	EBMV04	UD	BOMBA CENTRIFUGA MULTIETAPA VERTICAL Q=8,63 l/s H=15 mca Bomba centrífuga multietapa vertical tipo CRE 32-2-1 A-F-A-E-HQQE de Grundfos o equivalente para bombeo de un caudal de 8,63 l/s y una altura de 15 m.c.a. Aspiración DN50 e impulsión DN50. Cuerpo de función, rodete en acero inoxidable. Motor eléctrico asíncrono, trifásico, cerrado, de 5,5kW-4P-50Hz-380-415V-IP-55, estructura de soporte en perfiles de acero electrosoldado. Cuadro controlador y supervisor de bombas según E.T. Resto de características según E.T. de Proyecto. Instalada y probada en obra.	SIETE MIL QUINIENTOS DIECIOCHO EUROS	7.518,00
0649	EBSLF01	UD	BOMBA SUMERGIBLE Q= 130 m³/h a 6 m.c.a. P=3 KW Bomba sumergible para bombeo de aguas, de SULZER o equivalente modelo XFP100E-CB1.2-PE90/4-D05*10. Caudal: 130 m³/h. Altura manométrica: 6 m.c.a. Potencia nominal en eje: 3,0 kW. Ø Imp: 100 mm. Incluido módulo para supervisión de electrodos de temperatura y humedad, pedestal, anclajes, guía y cadena para izado. Incluso transporte, montaje, conexiones eléctricas y de control, pruebas de funcionamiento. Resto de características según E.T.	DOS MIL OCHOCIENTOS SESENTA EUROS con VEINTICINCO CÉNTIMOS	2.860,25

0601	E00341	UD	pH metro/mV metro/termómetro portátil pH metro/mV metro/termómetro portátil de las siguientes características: Instrumento electrónico, digital y portátil. Los caracteres de diseño son: Total impermeabilidad IP-67 hasta 1 m de profundidad. Fabricado en material ABS resistente y ligero. Gran estabilidad en superficies. Como caracteres técnicos destacan: Rango de medición: 0-14 pH/± 399 mV/± 1999 mV/0-100°C. Capacidad de memorización y recuperación de valores de mV y pH. El equipo se presenta con un estuche de transporte que le permite una fácil medición, así como la calibración "in situ". Incluye las siguientes soluciones de calibración: Solución de pH 4,01 (460 cc). Solución de pH 4,01 (25 x 20 ml). Solución de pH 7,01 (460 cc). Solución de pH 10,01 (460 cc). Solución de pH 9,18 (460 cc). Solución de almacenamiento (460 cc). Solución de relleno (4 x 50 ml. Solución electrolito 3,5 M KCl + AgCl). Solución de limpieza para usos generales (460 cc). Solución certificada de pH 4,01 (460 cc). Solución certificada de pH 7,01 (460 cc). Solución certificada de pH 10,01 (460 cc). Solución de pH 7,01 (25 x 20 ml).

0602	E003410	Ud	Floculador de 6 brazos Floculador de 6 brazos con iluminación posterior, de las siguientes características: Equipos diseñado para efectuar pruebas de floculación y ensayos afines. Velocidad de giro de los ejes constante durante todo el ensayo. Iluminación inferior con luz blanca fluorescente. Chasis metálico recubierto de una capa de pintura plástica al horno. Varillas agitadoras de acero inoxidable. Equipo con interruptor, fusible y piloto generales, interruptor y piloto de iluminación, mando regulador de la velocidad, mando de ajuste y velocidad mínima VARI-O-MIM, temporizador regulable de 60 minutos y tacómetro digital. CARACTERISTICAS TECNICAS: Alimentación: 220 V.a.c., 50 Hz. Consumo: 30 W. Regulación velocidad: Electrónica digital. Velocidad de agitación: Desde muy lento a 250 r.p.m. Separación entre ejes: 140 mm. Diámetro pala agitadora: 60 mm. Altura útil: 220 mm. Altura de pala de agitación: 10 mm. Dimensiones: 380 cm alto x 900 cm ancho x 190 cm fondo. Peso: 12 Kg.

0615	E00347	Ud	Turbidímetro portátil microprocesado Turbidímetro portátil microprocesado de las siguientes características: Medidor portátil, para determinar la turbidez en aguas potables y residuales. Con un rango de 0 a 1000 NTU y dos escalas de medición, de 0.00 a 50.00 NTU y de 50 a 1000 NTU, ha sido diseñado de acuerdo con el Standard Internacional ISO 7027. El equipo selecciona automáticamente el rango apropiado, de acuerdo con la turbidez de la muestra. Su funcionamiento está basado en un rayo de luz infrarrojo que atraviesa la cubeta. El sensor, colocado a 90° con respecto a la dirección de la luz, detecta la cantidad de luz dispersada por las partículas en suspensión de la muestra, la cual es transformada en valores NTU por el microprocesador. Su carcasa pesa menos de 400 gramos, aviso de pila baja, auto-apagado. La duración de la fuente de luz del Diodo de Emisión es indefinida, garantizando así el funcionamiento del equipo. Se suministra con dos cubetas de cristal, una tapa de cubeta para transporte, pila de 9 V. e instrucciones. Rango: 0.00 a 50.000 NTU; 50 a 1.000 NTU. Resolución: 0.01 y 1 NTU. Precisión: ±5% de la lectura (0 a 50 NTU); ±10% de la lectura (50 a 1.000 NTU). Fuente de luz: LED de infrarrojos. Duración de la fuente: Vida del instrumento. Detector de luz: Fotocélula de silicón. Pilas: 4 x 1.5 V. Duración de las pilas: 60 horas ó 3.000 lecturas. Auto apagado: Transcurridos 4 minutos. Condiciones de trabajo: 0 a 50°C/0 a 95% HR. Dimensiones: 220 x 83 x 46 mm. Peso: 350 g.

452PT	ud DISPENSADOR PAPEL TOALLA ud. Dispensador de papel toalla modelo MEDICLINICS DT2106CS o modelo equivalente, instalado.	5,00	49,53	247,65
452LP	ud LAVABO SOBRE PEDESTAL ud. Lavabo de Roca o similar, modelo Victoria de 52x41 cm con pedestal en blanco, con grifería temporizada de 1/2" marca Presto 605 o similar, válvula de desagüe de 32 mm, llave de escuadra de 1/2" cromada y sifón individual PVC 40 mm y latiguillo flexible 20 cm, totalmente instalada.	4,00	139,88	559,52
452LV	ud LAVABO MURAL ACCESIBLE Ud. Lavabo mural de Roca modelo Hall de 450x380 mm. en blanco, con mezclador de lavabo monomando adaptado, válvula de desagüe de 32 mm., llaves de escuadra de 1/2" cromadas y sifón individual y tuberías de enlace a paramento y sanitario cromado 40 mm. y latiguillo flexible 20 cm., totalmente instalado.	1,00	173,97	173,97
452Lm	ud LAVABO MURAL Ud. Lavabo mural de Roca modelo Hall de 450x380 mm. en blanco, con mezclador de lavabo monomando, válvula de desagüe de 32 mm., llaves de escuadra de 1/2" cromadas y sifón individual y tuberías de enlace a paramento y sanitario cromado 40 mm. y latiguillo flexible 20 cm., totalmente instalado.	4,00	159,54	638,16
452IN	ud INODORO TANQUE BAJO Ud. Inodoro de Roca modelo Victoria de tanque bajo en blanco, con asiento pintado en blanco y mecanismos, llave de escuadra 1/2" cromada, latiguillo flexible de 20 cm., empalme simple PVC de 110 mm., totalmente instalado.	5,00	146,64	733,20
452IA	ud INODORO TANQUE BAJO ACCESIBLE Ud. Inodoro de Roca modelo Access de tanque bajo en blanco de 480 mm. de altura (sin asiento), con asiento y tapa con bisagras de acero inox., mecanismos, llave de escuadra 1/2" cromada, latiguillo flexible de 20 cm., empalme hasta bajante o tubería de evacuación de PVC de 110 mm., totalmente instalado.	1,00	194,20	194,20
452UR	ud URINARIO MURAL Ud. Urinario de Roca modelo Site, o equivalente, con grifo temporizado Presto 27 1/2" y enlace a urinario y sifón incorporado, totalmente instalado.	1,00	221,55	221,55
452VT	ud VERTEDERO ud. Vertedero modelo Garda completo con mezclador exterior de caño giratorio modelo Victoria Plus de Roca o similar, rejilla, desagüe, enchufe de unión y fijación instalada.	1,00	173,39	173,39
452gd	ud GRIFERÍA DUCHAS Ud. Mezclador temporizado para ducha con pulsador de regulación de temperatura integrado, tipo Presto Alfa 80, y tubería de de enlace y rociador antivandálico, cromados para instalación vista, tipo Nofer 07072, o equivalente, i/p.p. de piezas especiales de enlace y fijación, totalmente instalado.	2,00	179,92	359,84
452TER	ud TERMO ELÉCTRICO 80 L JUNKERS ud. Termo eléctrico vertical/horizontal para el servicio de a.c.s acumulada, JUNKERS modelo HS 80-3B, con una capacidad útil de 80 litros. Potencia 2,0 kW. Ajuste de temperatura en intervalos de 10°C y tensión de alimentación a 230 V. Tiempo de calentamiento 140 minutos. Testigo luminoso de funcionamiento y display con indicación de temperatura. Depósito de acero vitrificado. Aislamiento de espuma de poliuretano sin CFC y ánodo de sacrificio de magnesio. Presión máxima admisible de 8 bar. Dimensiones 948 mm de alto y 452 mm de diámetro.	1,00	252,61	252,61

452dep	ud ACUMULACIÓN A.C.S. Ud. Depósito para acumulación ACV, Mod. SMART SL de 160 litros de capacidad, fabricado en acero inoxidable, aislado térmicamente, válvula de seguridad de 1", válvula de retención de 1", 2 llaves de esfera de 1", vaciado, vaseo de expansión de 8 l., accesorios y pequeño material, completamente montado, probado y funcionando	1,00	1.038,52	1.038,52
452BAT	ud BATER. 6 PANELES PLANOS FKC-1 W JUNKERS 13,50 M2 Ud. Batería de 6 captadores solares planos FKC-1 W de alto rendimiento, con tratamiento selectivo en cromo negro, para montaje en horizontal. Permite conexión en paralelo hasta 10 captadores. Circuito hidráulico de parrilla de tubos. Aislamiento de lana mineral de 55 mm de espesor. Estructura en forma de caja, realizada en fibra de vidrio. Superficie de apertura: 2,25 m2. Uniones mediante manguitos flexibles con abrazaderas de ajuste rápido. Instalado sobre cubierta plana mediante una estructura de soporte de aluminio con elementos de conexión incluyendo racores, válvulas de corte, purgador, etc. Incluso transporte, montaje, conexionado, pruebas de funcionamiento y puesta en marcha. Conexión hidráulica entre captadores y sujeción física a estructura.	1,00	3.103,35	3.103,35
452cis	ud CIRCUITOS INSTALACIÓN SOLAR Ud. Ejecución de circuitos primario y secundario con tubería cobre rígido, incluso puesta a punto de soldadura dura o blanda según corresponda, codos, tes, manguitos y demás accesorios y pequeño material, aislada con coquilla de Armaflex, de espesor nominal de 30 mm, recubierta de pintura protectora exterior del aislante, vaso de expansión para sistemas cerrados, de 12 litros de capacidad, 4 bar y 120°C de presión y temperatura máximas de trabajo, 1.5 bar de presión inicial, homologado según directiva 97/23/CE de aparatos a presión, conexión roscada R 3/4", incluso válvula de seguridad de 3 kg/cm.2, llaves, de cierre, circulador Grundfos para instalación con presión y temperatura máxima de 10 bar y 110°C respectivamente, constituido por motor de rotor encapsulado, selector de 3 velocidades, manómetros, separador de aire, sonda de temperatura, purgador y demás accesorios y pequeño material, completamente montado, probado y funcionando.	1,00	765,38	765,38
452ce	ud C. ELÉCT./CON. SYSTEMTRONIC ACS 2 Ud. Cuadro eléctrico y de control formado por caja estanca e interruptores de protección. Incluso cableado y bombas de conexión. Control diferencial, marca SYSTEMTRONIC, modelo PTC 2001/rd, con dos sondas de inmersión para actuación de bomba del primario (P<250W) mediante termostato diferencial, termostato mínima en paneles y termostato de máxima en acumulación, mediante actuación directa. Incluso accesorios y pequeño material, completamente montado, probado y funcionando.	1,00	362,00	362,00
452cen	ud CENTRALITA CONTROL JUNKERS TDS 050 Ud. Centralita solar JUNKERS modelo TDS 050 de regulación para una aplicación. Regulador por temperatura diferencial. Dos entradas tipo NTC (Temperatura panel y temperatura parte inferior del depósito). Display LCD con esquema de instalación en movimiento. Indicación de temperaturas, códigos de error, modo de funcionamiento y estado de la bomba. Una salida de tensión de 230V de corriente alterna para el circulador. Posibilidad de ajuste de diferencia de temperatura de conexión. Posibilidad de aplicación para recirculación entre depósitos. Posibilidad de ajuste de temperatura máxima en acumulador. Dimensiones: 134 x 137 x 38 mm.	1,00	163,54	163,54
452leg	ud LEGALIZACIÓN INSTALACIÓN A.C.S. Ud. Legalización instalación de energía solar térmica de potencia inferior a 21 kW, comprende tasas administrativas y tramitación por parte de un Organismo de Control Autorizado.	1,00	161,12	161,12

SUBAPARTADO 02.01.06.6 CERRAMIENTOS Y CUBIERTA				
463p	M2 PANEL PREFABRICADO DE HORMIGÓN 16 cm M2. Panel de cerramiento con acabado gris natural, de 16 cm. de espesor para colocación horizontal, con modulación según proyecto, tratamiento anticarbonatación, ambas caras lisas, i/elementos de fijación de acero galvanizado en caliente y sellado de juntas interior y exterior con SILCOSELL o equivalente, colocado, (medido deduciendo huecos mayores de 10 m2.)	761,49	32,61	24.832,19
463RC	M2 REVESTIMIENTO EXTERIOR DE CHAPA ONDULADA M2. Revestimiento de chapa ondulada de aluminio tipo tipo alubel ond-all 33 acabado lacado estandar a elegir, con p.p. elementos de fijación y remates inferior, a huecos, esquinas, coronación, etc, totalmente terminada.	483,64	18,26	8.831,27
463CI	M2 CUBIERTA PLANA NO TRANSITABLE m². Cubierta invertida completa, no transitable, constituida por: capa de hormigón aligerado de 10 cm de espesor medio, para formación de pendientes, con tendido de mortero de cemento M5 de 2 cm de espesor para regularizar la superficie; lámina geotextil de 200 g/m²; lámina asfáltica de oxiasfalto, GLASDAN 40 P OXI, en posición flotante respecto al soporte, salvo en perímetros y puntos singulares; lámina asfáltica de oxiasfalto, ESTERDAN 40 P ELAST, totalmente adherida a la anterior con soplete; cazoleta con conexión a bajante d110 mm con paragravillas; aislamiento térmico con planchas de poliestireno extruido de 50 mm de espesor, DANOPREN 50; lámina geotextil; capa de grava de canto rodado de 5 cm de espesor. Solución según membrana PN-6 de la norma UNE 104-402/96. Cumple los requisitos del C.T.E.	384,15	36,42	13.990,74
463RCH	M2 REVESTIMIENTO PETO CUBIERTA M2. Revestimiento de peto interior de cubierta entre coronación y solape con impermeabilizante de cubierta, realizado con chapa lacada 0,5 mm con p.p. elementos de fijación, totalmente terminada.	80,28	8,25	662,31
463	M2 FÁBRICA BLOQUES 40x20x20 cm GRIS Fábrica de bloques de hormigón color gris de medidas 40x20x20 cm, para terminación posterior en peanas de ventilaciones, i/relleno de hormigón HM-20 y armadura en zona según normativa y recibido con mortero de cemento y arena de río 1/6, i/p.p. de piezas especiales, roturas, aplomados, nivelados y limpieza todo ello según NTE-FFB-6.	243,82	30,71	7.487,71
463TB	M2 TABIQUE AUTOPORTANTE 2x15N+70+2x15N m². Tabique formado por una estructura de perfiles de chapa de acero galvanizada de 70 mm de ancho, a base de Montantes (elementos verticales) separados 400 mm entre ellos y canales (elementos horizontales), En cada cara se atomillan dos placas de yeso laminado, estandar tipo N de 15 mm de espesor, dando un ancho total terminado de 130 mm. Parte proporcional de tornillería, juntas estancas /acústicas de su perímetro, cintas y pasta de juntas, piezas de arriostamiento, anclajes mecánicos, etc. totalmente terminado con calidad de terminación Nivel 1 (Q1) para terminaciones de calidad de terminación Nivel 2 (Q2) para terminaciones estándar de pintura. Alma con Lana Mineral tipo Arena PR de 65 mm de espesor. Montaje según Norma UNE 102.041 IN y requisitos del CTE-DB HR. Montaje según Norma UNE 102.041 IN y requisitos del CTE-DB HR.	224,34	35,28	7.914,72
463TBh	M2 TABIQUE AUTOPORTANTE 2x15N+70+1x15H m². Tabique formado por una estructura de perfiles de chapa de acero galvanizada de 70 mm de ancho, a base de Montantes (elementos verticales) separados 400 mm entre ellos y canales (elementos horizontales), En una cara se atomillan dos placas de yeso laminado, estandar tipo N de 15 mm de espesor y en la otra una placa de yeso laminado hidrofugada tipo H1, de 15 mm, dando un ancho total terminado de 115 mm. Parte proporcional de tornillería, juntas estancas /acústicas de su perímetro, cintas y pasta de juntas, piezas de arriostamiento, anclajes mecánicos, etc. totalmente terminado con calidad de terminación Nivel 1 (Q1) para terminación de alicatado en lado placa hidrofugada, y calidad de terminación Nivel 2 (Q2) para terminaciones estándar de pintura en lado Alma con Lana Mineral tipo Arena PR de 65 mm de espesor. Montaje según Norma UNE 102.041 IN y requisitos del CTE-DB HR. Montaje según Norma UNE 102.041 IN y requisitos del CTE-DB HR.	151,74	31,88	4.837,47

4432A	M2 ALICATADO AZULEJO ANTIÁCIDO Alicatado con azulejo blanco mate antiácido, formato no inferior a 40x20 cm, recibido con adhesivo, incluso preparación de paramentos, cortes, cantoneras cromadas, rejuntados y limpieza, ejecutado según NTE y especificaciones, medido en superficie real, deduciendo huecos superiores a 0,5 m2.	63,16	22,79	1.439,42
440acus	M2 FALSO TECHO METÁLICO ABSORCIÓN ACÚSTICA m². Techo formado por una doble estructura de perfiles de chapa de acero galvanizada, instalada a dos niveles. La estructura primaria se compone a base de Perfiles continuos PH-45 en forma de "V" invertida, modulados cada 1100 mm y debidamente suspendidos de forjado de placa por medio de varilla roscada Ø 6 mm y tuerca y contratuerca cada 1100 mm dotada de aisladores acústicos para evitar la transmisión a techo. La segunda estructura formada por perfiles T-47 se acopla perpendicularmente a la parte inferior de la estructura primaria cada 500 mm mediante encaje directo en las horquillas dobles troqueladas del perfil PH-45. A esta estructura de perfiles, se atornilla a la segunda estructura de perfiles T-47 y perpendicularmente a ella una falso techo de chapa perforada minionda de 0,6 mm de espesor y 18 mm de canto, galvanizada en caliente, R3T6, parte proporcional de anclajes, cuelgues, tornillería, etc, según requisitos del CTE-DB HR.	53,05	41,32	2.192,03
468	M2 ENFOSCADO MAESTRADO Y FRATASADO Enfoscado maestreado y fratasado de 20 mm de espesor en toda su superficie con mortero de cemento y arena de río 1/4 en paramentos verticales, con maestras cada metro, i/preparación y humedecido de soporte, limpieza, p.p. de medios auxiliares con empleo, en su caso, de andamiaje homologado, así como distribución de material en tajos, s/NTE-RPE-7.	782,34	12,29	9.614,96
051pc2	KG REVESTIMIENTO MULTICAPA RESINA EXPOXI m². Suministro y puesta en obra del Sistema Multicapa Epoxi MASTERTOP 1220 Polykit, con un espesor de 2,0 mm, consistente en formación de capa base epoxi sin disolventes coloreada MASTERTOP 1200 o similar (rendimiento 1,6 kg/m²); espolvoreo en fresco de cuarzo MASTERTOP F 5 o similar con una granulometría 0,3-0,8 mm (rendimiento 3,0 kg/m²); sellado con el revestimiento epoxi sin disolventes coloreado MASTERTOP 1200 o similar (rendimiento 0,600 kg/m²), sobre superficies de hormigón o mortero, sin incluir la preparación del soporte. Colores Estándar.	81,71	20,70	1.691,40
449	M2 PINTURA PLÁSTICA LISA MATE COLOR Pintura plástica lisa mate color, en interiores, en paramentos horizontales y verticales, dos manos, incluso lijado, mano de imprimación con plástico diluido, plastecido, lijado y acabado.	1.146,29	3,18	3.645,20
289B	M2 TAPA DE CHAPA LACRIMADA GALVANIZADA e=4mm Tapa de chapa lacrimada de acero galvanizado de 4 mm de espesor, incluyendo el marco, tiradores, aros para cerradura con candado, anclada, totalmente colocada.	1,28	74,56	95,44
E0A060	UD TRAMEX. ENTRAMADO METÁLICO 30X30X3 Entramado metálico 30x30x3 tipo tramex o equivalente, incluso estructura auxiliar y suministro con parte proporcional de cerco también galvanizado, montaje, recibido y pintado.

E00341	UD pH metro/mV metro/termómetro portátil pH metro/mV metro/termómetro portátil de las siguientes características: Instrumento electrónico, digital y portátil. Los caracteres de diseño son: Total impermeabilidad IP-67 hasta 1 m de profundidad. Fabricado en material ABS resistente y ligero. Gran estabilidad en superficies. Como caracteres técnicos destacan: Rango de medición: 0-14 pH/± 399 mV/± 1999 mV/0-100°C. Capacidad de memorización y recuperación de valores de mV y pH. El equipo se presenta con un estuche de transporte que le permite una fácil medición, así como la calibración "in situ". Incluye las siguientes soluciones de calibración: Solución de pH 4,01 (460 cc). Solución de pH 4,01 (25 x 20 ml). Solución de pH 7,01 (460 cc). Solución de pH 10,01 (460 cc). Solución de pH 9,18 (460 cc). Solución de almacenamiento (460 cc). Solución de relleno (4 x 50 ml). Solución electrolito 3,5 M KCl + AgCl). Solución de limpieza para usos generales (460 cc). Solución certificada de pH 4,01 (460 cc). Solución certificada de pH 7,01 (460 cc). Solución certificada de pH 10,01 (460 cc). Solución de pH 7,01 (25 x 20 ml).	1,00	1.107,87	1.107,87
E00342	Ud Oxímetro portátil de las siguientes Medidor de oxígeno disuelto portátil de las siguientes características: Instrumento electrónico y portátil para la medición de la concentración de oxígeno disuelto en agua. Visualización: LCD (Display de cristal líquido) con botón para sobreiluminación. - Medición simultánea de oxígeno (mgr/l. ó % de saturación) y temperatura. - Rango de medición: 0.20 mgr/l. 0-200 % aire saturado. -5 a +45°C. - Resolución: 0,01 mgr/l. 0,1 % . 0,1°C. - Compensación automática de temperatura. - Compensación por presión y salinidad por introducción de los datos. - Cámara de calibración interna para la calibración en campo, transporte y almacenamiento. - Sonda de acero inoxidable. - Cable de 3 metros. de longitud. - Alimentación: 6 pilas tamaño AA para aprox. 100 horas.	1,00	2.040,85	2.040,85
E00343	Ud Estufa de desecación y esterilización Estufa para desecación y esterilización de las siguientes características: Convección natural de aire. Para temperaturas regulables de: 40°C a 250°C. Construidas conforme a normas DIN 12.880. Prueba térmica conforme a normas DIN 50.001. Sistema eléctrico, protección IP-20, según normas DIN 40.050. Homogeneidad de la temperatura: ±1,5% . Estabilidad de la temperatura: ±0,5% . Fabricado según normas comunitarias sobre seguridad. Marcado con el distintivo CE. CARACTERISTICAS: Caja interior y cotrapuerta en acero inox. AISI-304 (DIN 1.4301). Mueble exterior metálico pintado al horno con resina epoxi. Junta elástica de silicona en la puerta. Bandejas perforadas en acero inox. AISI-304, ajustables en altura, con dispositivo que permite retirarlas sin que vuelquen. Puerta exterior metálica pintada al horno. Dispositivo de aireación/salida gases, regulable. Calefacción por resistencias eléctricas de gran superficie, distribuidas alrededor de la caja. PANEL DE MANDOS: Interruptor general. Termostato hidráulico regulador de la temperatura con escala graduada en °C. Termómetro analógico de esfera, lector de la temperatura. Piloto de señalización de calefacción. Capacidad: 42 litros. Medidas interiores en cm: (400 x 350 x 300) (alto x ancho x fondo). Medidas exteriores en cm: (710 x 500 x 460) (alto x ancho x fondo). Potencia: 900 W. Peso: 38 kg. Se suministra con dos bandejas perforadas en acero inoxidable.	1,00	1.690,99	1.690,99
E00344	Ud Horno de mufla Horno de mufla de las siguientes características: Equipo con cámara refractario de baja densidad. Temperatura máxima: 1.200°C. Regulación de temperatura: automática con indicador analógico, o si se solicita bajo demanda, indicador digital. Dimensiones útiles: 160 x 200 x 230) (alto x ancho x fondo) (mm). Dimensiones exteriores: (490 x 430 x 450) (alto x ancho x fondo) (mm). Potencia: 3.800 W. Tensión: 220. Peso: 41 Kg.	1,00	1.895,06	1.895,06

E00347	Ud Turbidímetro portátil microprocesado Turbidímetro portátil microprocesado de las siguientes características: Medidor portátil, para determinar la turbidez en aguas potables y residuales. Con un rango de 0 a 1000 NTU y dos escalas de medición, de 0.00 a 50.00 NTU y de 50 a 1000 NTU, ha sido diseñado de acuerdo con el Standard Internacional ISO 7027. El equipo selecciona automáticamente el rango apropiado, de acuerdo con la turbidez de la muestra. Su funcionamiento está basado en un rayo de luz infrarrojo que atraviesa la cubeta. El sensor, colocado a 90° con respecto a la dirección de la luz, detecta la cantidad de luz dispersada por las partículas en suspensión de la muestra, la cual es transformada en valores NTU por el microprocesador. Su carcasa pesa menos de 400 gramos, aviso de pila baja, auto-apagado. La duración de la fuente de luz del Diodo de Emisión es indefinida, garantizando así el funcionamiento del equipo. Se suministra con dos cubetas de cristal, una tapa de cubeta para transporte, pila de 9 V. e instrucciones. Rango: 0.00 a 50.000 NTU; 50 a 1.000 NTU. Resolución: 0.01 y 1 NTU. Precisión: ±5% de la lectura (0 a 50 NTU); ±10% de la lectura (50 a 1.000 NTU). Fuente de luz: LED de infrarrojos. Duración de la fuente: Vida del instrumento. Detector de luz: Fotocélula de silicona. Pilas: 4 x 1.5 V. Duración de las pilas: 60 horas ó 3.000 lecturas. Auto apagado: Transcurridos 4 minutos. Condiciones de trabajo: 0 a 50°C/0 a 95% HR. Dimensiones: 220 x 83 x 46 mm. Peso: 350 g.	1,00	1.154,53	1.154,53

EPRFAN01	UD PUENTE RASQUETAS ESPESADOR DE FANGOS Ø 7,5 m Y CAMPANA Mecanismo de puente de rasquetas del espesador de fangos, de 7.500 mm de diámetro, de acero inoxidable AISI-316L. Velocidad del racador 0,15-0,20 rpm., bancada del motorreductor en acero al carbono galvanizado, mangón de acoplamiento en acero al carbono cincado. Eje central AISI-316, campana deflectora AISI-316L, brazos inferiores soporta rasquetas y rasquetas de fangos en acero inoxidable AISI-316L. Rascadores de goma en EPDM. Accionamiento directo mediante motorreductor eléctrico de 0,18 Kw. Incluye campana deflectora AISI-316L. limitador de par electrónico. Incluido transporte, montaje, conexiones eléctricas y pruebas de funcionamiento y de control. Resto de características, según ET.	1,00	10.869,89	10.869,89
ECUFAN01	UD CAMPANA CUBIERTA ESPESADOR PRFV DE 7.500 MM DE DIÁMETRO Cubierta de PRFV para espesor de fangos de 7,5 m de diámetro de cuba, formada por dos zonas. Pasarela de 1,2 m de anchura. Incluido transporte y montaje. Resto de características, según ET.	1,00	6.023,42	6.023,42
EVCM12516	UD VÁLVULA DE COMPUERTA MANUAL DN125 PN16 Válvula de compuerta de cierre elástico de 125 mm. de diámetro nominal y 16 At. de P.N., de accionamiento manual por volante, de cuerpo de fundición nodular GGG-50, con eje de acero inoxidable al 13 % Cr. con roscas conformadas por laminación en frío, cierre en fundición nodular, tornillería de acero inoxidable, protegida contra la corrosión mediante aplicación de doble capa de pintura epoxy, totalmente colocada y probada. Resto de características según ET.	2,00	202,32	404,64
ECPSM150	UD PASAMUROS INOX AISI-316-L DN-150 mm Carrete pasamuros de acero inoxidable, con brida loca en un extremo y placa de estanqueidad, DN 150, longitud: 500 mm. Materiales:Carrete y placa de estanqueidad: AISI 316 L, brida: aluminio, totalmente instalado y probado en obra. Resto de características según ET.	1,00	164,14	164,14

465.1	M2 PUERTA DOBLE CHAPA ACERO CON LAMAS Puerta de paso hojas abatibles de doble chapa lisa de acero de 1 mm de espesor, con aislamiento interno de fibra de vidrio, engatillada, realizada en dos bandejas, con rigidizadores de tubo rectangular, i/manillas de acero inoxidable y cerradura, con dos o cuatro rejillas de ventilación con malla anti insectos interior, patillas para recibir en fábricas, herrajes de colgar y de seguridad, imprimación antióxido y pintura al esmalte, totalmente colocada incluyendo el recibido de fábricas.	2,20	75,01	165,02
464cf	M2 CARPINTERÍA FIJA ALUMINIO m². Carpintería fija con junquillos para la fijación del vidrio, de aluminio modelo con rotura de puente térmico, Alfil A54RPT de SAPAGROUP con un ancho de marco de 54 mm y con un ancho de hoja de 61 mm, medida del frente de 96,3 mm, con sistema de cámara europea, con espesor de perfil de 1,5 mm, con sistema de cierre por junta central de estanqueidad en EPDM, coplanar exteriormente y con resalte de hoja sobre el marco al interior, para un acristalamiento con altura de galce de 22 mm y anchura hasta 44 mm en marcos y 51 mm en hojas, lacado (entre 60-100 micras) en color estándar (RAL estándar: blanco, gris...), herrajes de colgar, p.p. de cerradura Tesa o similar y costes indirectos. Homologada con Clase 4 en el ensayo de permeabilidad al aire según norma UNE-EN 1026:2000. La transmitancia máxima del marco es de 2,90 W/m² K, y cumple en las zonas A, B, C, D y E, según el CTE/DB-HE 1.	0,96	144,71	138,92
464V3	M2 VIDRIO SEGURIDAD STADIP 44.1 INCOLORO (2B2) m². Acristalamiento de vidrio laminar de seguridad Stadip compuesto por dos vidrios de 4 mm de espesor unidos mediante lámina de butiral de polivinilo incolora de 0,38 mm, clasificado 2B2 según UNE-EN 12600, fijado sobre carpintería con acuíñado mediante calzos de apoyo perimetrales y laterales y sellado en frío con silicona neutra, incluso colocación de junquillos, según UNE 85222:1985.	0,96	37,05	35,57
521	M2 CELOSIA FIJA VENTILACIÓN Celosía metálica fija para ventilación, formada por cerco con empanelado de lamas de acero de 60 mm, con abertura mínima de 1 cm entre lamas, malla de 2 mm para evitar entrada de insectos, garras de sujeción a soporte de 10 cm, elaborada en taller y montada en obra, totalmente colocada.	0,48	73,80	35,42
020	KG ACERO S 275 J PERFILES LAMINADOS Acero S 275 J en perfiles laminados elaborado y colocado.	2.466,72	1,95	4.810,10
474.1	ML CANALON CHAPA PRELACADA 50cm Canalón de chapa prelacada en color, de 50 cm. de desarrollo fijado mediante ganchos ocultos con tornillo autoroscante 40 cm., incluso p.p. de embocadura de bajante, codos y piezas especiales.	13,80	11,85	163,53
474.2	ML BAJANTE DE CHAPA PRELACADA DN110 Bajante de chapa prelacada en color, DN110, fijado mediante ganchos con tornillo autoroscante 20 cm., incluso p.p. de embocadura de bajante, codos y piezas especiales.	2,00	12,29	24,58
290B	M2 ESCALERA Y PASARELAS DE ACERO GALVANIZADO. BARANDILLAS GALVANIZ Escalera y pasarelas de acceso de forma según planos, ejecutada en perfiles de acero galvanizado en caliente, incluso barandilla tubular del mismo material, de 90 cm de altura en uno o dos lados, rodapié de seguridad del mismo en uno o dos lados, así como entramado metálico de 30x30x3 en descansillos y peldaños, medida según su proyección en planta. Anclada a los muros y/o solera, instalada.	7,00	81,77	572,39

520	M2 CUBIERTA PANEL SANDWICH (E=50 mm.) Cubierta con panel tipo sandwich espesor 50 cm., con doble chapa prelacada de 0,4 mm de espesor, y aislamiento térmico de poliuretano, fijada con gancho de acero galvanizado, incluso p.p de piezas de remate, totalmente colocada.	71,04	27,03	1.920,21
519	ML REMATE DE CHAPA PRELACADA CUBIERTA Remate de chapa prelacada en color, para cubrir parte superior de bloque o panel, hasta el panel sandwich de la cubierta por el interior del peto, fijado mediante tacos y/o ganchos anclado a muro y o cubierta, dispuesto según planos.	34,00	22,47	763,98
465.1	M2 PUERTA DOBLE CHAPA ACERO CON LAMAS Puerta de paso hojas abatibles de doble chapa lisa de acero de 1 mm de espesor, con aislamiento interno de fibre de vidrio, engatillada, realizada en dos bandejas, con rigidizadores de tubo rectangular, i/manillas de acero inoxidable y cerradura, con dos o cuatro rejillas de ventilación con malla anti insectos interior, patillas para recibir en fábricas, herrajes de colgar y de seguridad, imprimación antióxido y pintura al esmalte, totalmente colocada incluyendo el recibido de fábricas.	2,20	75,01	165,02
464cf	M2 CARPINTERÍA FIJA ALUMINIO m². Carpintería fija con junquillos para la fijación del vidrio, de aluminio modelo con rotura de puente térmico, Alfil A54RPT de SAPAGROUP con un ancho de marco de 54 mm y con un ancho de hoja de 61 mm, medida del frente de 96,3 mm, con sistema de cámara europea, con espesor de perfil de 1,5 mm, con sistema de cierre por junta central de estanqueidad en EPDM, coplanar exteriormente y con resalte de hoja sobre el marco al interior, para un acristalamiento con altura de galce de 22 mm y anchura hasta 44 mm en marcos y 51 mm en hojas, lacado (entre 60-100 micras) en color estándar (RAL estándar: blanco, gris...), herrajes de colgar, p.p. de cerradura Tesa o similar y costes indirectos. Homologada con Clase 4 en el ensayo de permeabilidad al aire según norma UNE-EN 1026:2000. La transmitancia máxima del marco es de 2,90 W/m² K, y cumple en las zonas A, B, C, D y E, según el CTE/DB-HE 1.	1,44	144,71	208,38
464V3	M2 VIDRIO SEGURIDAD STADIP 44.1 INCOLORO (2B2) m². Acristalamiento de vidrio laminar de seguridad Stadip compuesto por dos vidrios de 4 mm de espesor unidos mediante lámina de butiral de polivinilo incolora de 0,38 mm, clasificado 2B2 según UNE-EN 12600, fijado sobre carpintería con acuíado mediante calzos de apoyo perimetrales y laterales y sellado en frío con silicona neutra, incluso colocación de junquillos, según UNE 85222:1985.	1,44	37,05	53,35
521	M2 CELOSIA FIJA VENTILACIÓN Celosía metálica fija para ventilación, formada por cerco con empanelado de lamas de acero de 60 mm, con abertura mínima de 1 cm entre lamas, malla de 2 mm para evitar entrada de insectos, garras de sujeción a soporte de 10 cm, elaborada en taller y montada en obra, totalmente colocada.	0,48	73,80	35,42
020	KG ACERO S 275 J PERFILES LAMINADOS Acero S 275 J en perfiles laminados elaborado y colocado.	2.475,40	1,95	4.827,03
474.1	ML CANALON CHAPA PRELACADA 50cm Canalón de chapa prelacada en color, de 50 cm. de desarrollo fijado mediante ganchos ocultos con tornillo autoroscante 40 cm., incluso p.p. de embocadura de bajante, codos y piezas especiales.	19,20	11,85	227,52

-08.18	-ACOMETIDA A DEPÓSITO DE VILLAR DE ARNEDO.....	17.900,21
09	ACOMETIDAS ELÉCTRICAS.....	231.437,23
-09.01	-ACOMETIDA A.T Y C.T. BOMBEO BERGASA.....	68.784,36
-09.02	-ACOMETIDA A.T Y C.T. BOMBEO VALLE DE OCÓN Y AUSEJO.....	73.033,38
-09.03	-ELECTRICIDAD EN REDUCTORA DE PRESIÓN (P260) A RINCÓN-ALFARO.....	1.253,86
-09.04	-ACOMETIDA REDUCTORA DE PRESIÓN ALTO DE QUEL-ALCANADRE (P190).....	15.805,12
-09.05	-ELECTRICIDAD EN REDUCTORA DE PRESIÓN (P410) A VILLAR-PRADE-ALCAN.....	1.253,86
-09.06	-ACOMETIDA ETAP AT.....	35.165,04
-09.07	-ACOMETIDA AZUD AT.....	36.141,61
10	TELEMANDO Y TELECONTROL.....	806.485,92
11	MEDIDAS CORRECTORAS Y MEDIOAMBIENTALES.....	496.527,62
12	SEGURIDAD Y SALUD.....	311.697,08
13	GESTIÓN DE RESIDUOS EN FASE DE CONTRUCCIÓN.....	435.016,25
	TOTAL EJECUCIÓN MATERIAL	33.943.379,74
	13,00% Gastos generales.....	4.412.639,37
	6,00% Beneficio industrial.....	2.036.602,78
	VALOR ESTIMADO DEL PROYECTO	40.392.621,89
	Asciende el Valor Estimado del Proyecto a la expresada cantidad de CUARENTA MILLONES TRESCIENTOS NOVENTA Y DOS MIL SEISCIENTOS VEINTIUN EUROS con OCHENTA Y NUEVE CÉNTIMOS	
	21,00% I.V.A.....	8.482.450,60
	TOTAL PRESUPUESTO BASE DE LICITACIÓN	48.875.072,49
	Asciende el Presupuesto Base de Licitación a la expresada cantidad de CUARENTA Y OCHO MILLONES OCHOCIENTOS SETENTA Y CINCO MIL SESENTA Y DOS EUROS con CUARENTA Y NUEVE CÉNTIMOS	
	VºBº: El Director del Proyecto:	Logroño, junio de 2020 El Ingeniero Autor del Proyecto:
	Fdo: Ángel Castillo González Consortio de Aguas y Residuos de La Rioja	Fdo: Oscar F. González Vega ING. CAMINOS, CANALES Y PUERTOS Colegiado N° 10.755
